

<i>Segment:</i>	Diver
<i>Line nr:</i>	55
<i>Line name</i>	Pro Dive 3000
<i>Version:</i>	Abyssus
<i>Material:</i>	titanium + bronze or aluminium bronze
<i>Ltd:</i>	133 pcs
<i>code:</i>	
KW55-04	Titanium + Bronze / Black-blue Dial
KW55-05	Aluminium Bronze / Black-blue Dial

History

Visconti watch team has always paid great attention and owned high competence about water and diving watches. This watch is the latest evolution of professional divers introduced by Visconti on 2014.

CNS scuba divers (Cooperativa Nazionale Sommozzatori) is one of the world's best deep professional diving companies.

Cooperation between Visconti and CNS scuba divers has led to design and produce a timepiece with unique technical contents.

Note

The watch-case is mono bloc, for maximum resistance; glass support (5 mm thick high sapphire) seals the watch from the top and supports the rotating bezel (fixed by the four lugs with screws), removable from the outside.

The unidirectional gear rack is positioned outside the bezel for maximum cleaning when diving in polluted environments; an exterior locking device for bezel assures the certainty of the setup of diving times; the crown has a quick bayonet lock and not a screwed one, as it often happens in many divers.

The result of this technological challenge is a 3.000-meter waterproof watch.

The Titanium-bronze Pro Dive combines the two most technologically advanced materials in the collection: titanium grade 5 and aluminum bronze to achieve the lowest possible weight and the highest and long-lasting resistance to the demanding marine environment.

The most amazing feature of the Pro-Dive watch is the bayonet crown, a Visconti project, which allows both the dismantling of the stem from the top when the watch is opened, and the diving with

crown itself unlocked, as water proof is ensured not by active compression of the O-Rings, but by a hydraulic seal on the axis.

Technical Features

<i>Movement</i>	Swiss made automatic movement 28.800 A/h. Adjusted to 5 positions, average rate -5 +10 sec./day. Soignée finish, self-winding mass with engraved Visconti logo. Power reserve: approx. 42 hours. Dimensions: Ø 25.60 mm. Thickness 5.10 mm. VI-AC264-02 based on Soprod 9340 m 31 jewels, Glucydur balance wheel.
<i>Functions</i>	Power Reserve: HH, MM, Sweep seconds. Date window at 2 o'clock. Power reserve display at 11 o'clock.
<i>Case</i>	Grade 5 titanium monobloc case or Aluminium bronze monobloc case micro-shot blasted and satin finished; bayonet-mounted crown at 2 o'clock with patented system for unlocking from movement. Four aluminium-bronze lugs, satin-finished. 5.00 mm thick, flat-convex sapphire watch glass, rotating aluminium-bronze bezel with engraved time scale and micro-dot in luminescent material at 0 o'clock, with external aluminium bronze saw tooth and sliding rotation bloc at 4 o'clock. Automatic helium escape valve at 6 o'clock.
<i>Dimensions</i>	Diameter 45.00 mm Thickness 17.80 mm Overall dimensions at crown 54.40 mm Height 57.90 mm
<i>Waterproof to</i>	300 ATM
<i>Hands</i>	Hands to an exclusive Visconti design: hours, minutes, sweep seconds hand with triangle. Luminescent coating. Triangular power reserve.
<i>Strap/Bracelet</i>	In water-resistant leather. Visconti satin-finish stainless steel buckle.
