## **History**

High performance diving watches are always being characterized by a traditionally austere design. Visconti has combined the style creativity, the taste for color and the attention to the details which are part of Visconti' high-end traditional craftsmanship, with the fastness of a real performing and reliable technical project.

Full Dive seems to be a unique timepiece in its inspiration: the freedom to explore every environment, both the tough and the severe one of the deep dive, and the differently demanding of daily life, where the watch stands as a sign of Visconti's capabilities.

## **Note**

This timepiece takes advantage of the traditional and reliable two-pieces screwed construction, as well as the automatic Swiss movement and a magnetic stainless-steel case, to create a solid starting point for design creativity.

A screwed crown and a curved sapphire crystal complete the technical heritage of Full Dive.

## **Technical Features**

|                       |   |
|-----------------------|---|
| <i>Movement</i>       | <b>Automatic Swiss Made movement</b><br>28.800 A/h. Power reserve: approx. 42 hours.<br>Dimensions: Ø 25.60 mm.<br>Thickness 4.60 mm.<br><b>ETA 2824-2</b> 21 jewels.   |
| <i>Functions</i>      | TO: HH, MM, central seconds.<br>Date window at 6 o'clock.   |
