History

Here we have the evolution of a watch characterized by design and attention to colors and treatments (as is Full Dive time only) in a chronograph.

This path has required a lot of attention: not to trespass into overdesign or, and on the other side, not to devalue its innovative charge for needs due to use.

Full Dive Chrono combines the highest level of diving performances, design sportiness, charm in color effects and ease of use and dial reading.

Note

The integration between counters' graphics and dial hours/minutes one, has allowed Visconti designers to draw these counters in a larger diameter than the usual, to provide easy reading and neatness of the dial.

Even eliminating any sign for small seconds at 9 o'clock contributes to this result.

On the other hand, the seven days' date display simplifies the daily use of this Chronograph.
