<i>Line nr:</i>	30
<i>Line name</i>	ISLA MALLORCA
<i>Version:</i>	Time Only, Chronograph
<i>Material:</i>	St. Steel / Bronze
<i>Ltd:</i>	KW30-01, KW30-11, KW30-12, KW30-21:200 pcs KW30-31: 100 pcs
<i>Code Time Only</i>	
KW30-01	St. Steel / Black dial
KW30-11	Bronze / Green dial
KW30-12	Bronze / Black dial
<i>Code Chrono</i>	
KW30-21	St. Steel / Tobacco dial
KW30-31	Bronze / Blue dial

History

Italy has over 7.500 km of beautiful coastlines with historical sea places: the culture of sea come from ancient times. Roman empire used to call the Mediterranean Sea as " Mare Nostrum ".

Moreover, so many sea explorers were Italian; we just remind Amerigo Vespucci, Cristoforo Colombo, Da Verrazzano...

Mallorca Island is a beautiful island in the Mediterraeum blue sea, between Italy and Spain.

Visconti Isla Mallorca watch is based on the above heritage, mixing its sport attitude to the performance of a 1000 mt diving watch.

High performance diving watches are always being characterized by a traditionally "austere" design. While Visconti has always combined its style creativity, the taste for color and the attention to the details, which are part of Visconti' high-end traditional craftsmanship.

Isla Mallorca watch take its inspiration both from the tough and severe environment of deep dive, than from the less demanding of daily life, where the watch stands as a sign of Visconti's capabilities as well as of owner's personality.

Note

This Visconti timepiece has been designed being convinced that a simple design can be also a plus: the performance of a traditional sport-diver watch can be obtained without a search for complications and the relevant risks of troubles, which arise from a missing or improper maintenance of the unidirectional rotating bezel. On the other end, a 3 pieces case design, most of the times not used in scuba watches, makes easier the maintenance operations.

Another advantage is given by the 4 horns screwed to the carrure: it allows in an easier and cheaper way to fix & restore potential damages caused by an extreme usage of the watch.

This design solution has also led to a big dial, which can be read in a clear way in all light conditions.

Technical Features

<i>Movement</i>	<p>Time Only: Automatic Swiss Made Movement, 28.800 A/h. Power reserve: approx. 38 hours. average rate 0 ± 20 sec./day. Dimensions: \varnothing 25.60 mm. Thickness 4.60 mm Sellita SW200-1, 26 jewels, or equivalent.</p> <p>Chronograph: Automatic Swiss Made Movement 28.800 A/h. Adjusted in 3 positions. Power reserve: approx. 48 hours without chrono function. Average rate 0 ± 15 sec./day. Dimensions: \varnothing 30.00 mm. Thickness 7.9 mm. Sellita SW 500 25 jewels, or equivalent.</p>
