History

It was one of the most fertile periods in contemporary Italian cinema and saw the explosion of celebrity culture. The economic boom helped to encourage new fashions, fun and rejection of the rules.

American films depicted and at the same time acted as a catalyst for this vast social mosaic.

Famous stars from Hollywood moved the sets to Rome. Via Veneto filled up with stars, nobles, Eastern princes and billionaires.

Fiat 500 and Vespa scooter were already symbols of those years as well as shapes and lines were smooth, curve, soft.

“La dolce vita” by Fellini told the story and paved the way, creating a legendary scene. The Visconti ROMA 60's collection intends to celebrate those year, with a timeless, fascinating watch.

Note

ROMA 6's watch is available in stainless steel, but also with an aged stainless-steel case, that is quite innovative for watch cases. A bronze case is offered with a ltd version.

Craquelure dials evoke vintage as well as the combination with nice leather straps.

The mix of shapes, finishing, material, colors, make ROMA 60's to look really very charming and full with the unique Italian elegance and design of the years.

Technical Features
