

<i>Segment:</i>	Fun
<i>Line nr:</i>	13
<i>Line name</i>	LAVA
<i>Version:</i>	Emotion / Evolution / Italian Style / Italian Light
<i>Material:</i>	St. steel + Lava compound
<i>Ltd:</i>	- Italian Style 200 pcs - Italian Light 200 pcs
<i>code:</i>	
KW13-01	Emotion Black PVD/Red magma
KW13-02	Emotion PVD/Green magma
KW13-11	Evolution Black PVD/Campidoglio black
KW13-13	Evolution Inox / Campidoglio Blue
KW13-21	Italian Style - Black PVD/Black
KW13-22	Italian Light Inox/Black & Strass

History

The project is a natural link to the Visconti successful pen collection Homo Sapiens.

Therefore, Visconti has used the same material: antique and natural lava from the Etna volcano, in south of Italy.

Visconti has successfully produced a material containing over 50% of pure basaltic lava, catalysed together with resin in a formula, whose extraordinary characteristics practically transforms it into a material which perfectly fit wrist watches and has many features that make it unique.

Visconti lava compound is:

- *Virtually unbreakable*, with a high degree of resilience.
- *Flameproof*, with a resistance to heat of over 100°C.
- *Slightly hygroscopic*, allowing to absorb hand sweat during use.
- *Dense at touch*, allowing the best finger-relaxing grip or touch.
- *Unquestionably new*, as materials employed in watch cases.

Note

Working on dials we have represented a path:

- it starts with magma the symbol of primordial Kaos (emotion version), inspiring people who follow their emotions;
- then goes to the kingdom of Order (Evolution version) represented by the esoteric drawing which is on the ground of Campidoglio Square in Rome.
- then you find the art & design period (Italian Style version), which represent the search for beauty;
- finally including shining stones (Italian Light version) aims to higher level product.
- Visconti has mixed two halves (Shells) of Lava compound with a special stainless-steel frame.

The 2 limited versions (Italian Style and Italian Light) have a dial featuring small seconds. The Italian Light version presents 12 strass in the Italian Flag Colors (Red, Green, White).

Technical Features

<i>Movement</i>	Automatic Movement 11 ½, 21.600 A/h, power reserve: approx. 40 hours, Myota 8218 , 21 jewels
<i>Functions</i>	HH, MM, day display at 3 o'clock or small seconds at 4 o'clock.
<i>Case</i>	AISI316 stainless steel case, polished and satin-finished with a PVD black coating version. External case in lava compound. Screwed back-cover, crown at 3 o'clock, domed crystal.
<i>Dimensions</i>	Diameter 42.00 mm. Thickness 11.20mm. Overall dimensions at crown 44.00 mm. Height 45.20 mm.
<i>Waterproof to</i>	10 ATM
<i>Dial</i>	Flat dial with applied indexes/strass. Date display at 3 o'clock or small seconds at 4 o'clock.
<i>Hands</i>	Hands to an exclusive Visconti design: skeleton hours and minutes. Luminescent coating.
<i>Strap/Bracelet</i>	In water-resistant leather. Visconti satin-finish stainless steel buckle. 22/18 mm.
